1. The public sector includes the central and local governments and the social security system. Revenues and expenditures are here itemised according to the UN system of national accounts and deviate from the treasury accounts on accruals basis or (within the year) on cash basis shown in Table 12. The main differences are that by SNA standards i) in each year only pension liabilities increases due to activities during that year are shown; ii) instead of showing depreciation of tax claims as expenditures, a precautionary deduction is made on the revenue side; iii) profits from the sale of government assets are not shown as revenues. Instead, they are shown as a part of lending and borrowing transactions. *Source:* National Economic Institute.
