8. Gross foreign exchange reserves at end of period as a ratio of the average monthly value of merchandise imports. Calculated at fixed exchange rates. 9. The denominator is foreign short-term liabilities of credit institutions (deposit money banks and investment banks). 10. Prices in SDR. Annual figures are % changes between annual averages. 11. Real effective exchange rate of the Icelandic króna based on relative consumer prices (a trade-weighted average of trading partners' consumer prices is used). 1980 = 100. 12. Cash basis. 13. The ICEX-15 index from January 1 1998. Earlier the ICEX stock price index. Annual figures are % changes over year. 14. Residential housing in the Greater Reykjavík Area. 3-month moving average of price per m<sup>2</sup> based on present value of contracts. Annual figures are % changes over year.

1. The public sector includes the central and local governments and the social security system. Revenues and expenditures are here itemised according to the UN system of national accounts and deviate from the treasury accounts on accruals basis or (within the year) on cash basis shown in Table 12. The main differences are that by SNA standards i) in each year only pension liability increases due to activities during that year are shown; ii) instead of showing depreciation of tax claims as expenditures, a precautionary deduction is made on the revenue side; iii) profits from the sale of government assets are not shown as revenues. Instead, they are shown as a part of lending and borrowing transactions. *Source:* National Economic Institute.
